

The Miraculous Mass Migrating

Ipsilon Dart Moth

(Agrotis ipsilon)

© Todd Council, iNaturalist, some rights reserved (CC-BY-NC)

Much like the Monarch butterfly,
some moths migrate
to warmer temperatures
or to find a better food supply.

Found throughout the U.S., this moth
migrates to Mexico in the fall.

Pollinators -- like moths -- fly from plant to plant carrying pollen, which helps plants reproduce. More than 180,000 plant species and 1200 crops, like many fruits, vegetables, and nuts, rely on the work of pollinators. Check out the [Westmoreland Pollinator Partners on Facebook](#) for more information on how you can protect pollinators!
