

Financial and other support for the Storm Drain Marker Outreach Project has been provided by the Department of Environmental Protection's Environmental Education Grants Program.

Storm Drain Marker Outreach Project

- Prevent nonpoint source pollution from entering our waterways via storm drains.
- Install markers in walkable urban areas so they are visible to the public.
- Engage community volunteers to help with installation.
- Post information about nonpoint source pollution on your website and social media pages.

If you are interested in participating in the project, please contact Jen Novak, 724-837-5271 ext. 211 or jen@wcdpa.com
